PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience designing and developing cross-platform mobile applications using Flutter and Dart. Experienced in responsive interfaces, Firebase services, REST APIs, local data persistence, and state management with Provider, BLoC, and GetX. Comfortable with authentication, databases, notifications, JSON APIs, Git/GitHub, and developing modern iOS applications with SwiftUI.

TECHNICAL SKILLS

- Flutter — UI, Widgets, Navigation, Responsive Layouts
- Dart — OOP, async/await, Streams
- Swift & SwiftUI — iOS UI and application development
- State Management — Provider, BLoC, GetX
- Local Storage — Hive, Shared Preferences
- REST API Integration & JSON Parsing
- Firebase — Auth, Firestore
- Local Notifications & Scheduled Background Tasks
- Git & GitHub — Version Control
- Ms Word & PowerPoint
- Video Editing
- Team Work & Time Management

EXPERIENCE

Flutter Developer (Intern) — Khasologix Software House

March 2026 – Present

- Contributing to Rently, a car rental mobile application, with a focus on implementing modern, responsive, and user-friendly Flutter interfaces.
- Developed a weather application integrating REST APIs and JSON parsing to retrieve and display live weather information.
- Built a Todo application using Hive as a local database and GetX for state management, including local data handling and reactive UI updates.
- Worked with Flutter application architecture, reusable widgets, navigation, state management, and responsive layouts while developing and testing mobile features.
- Used Git and GitHub for source-code version control and maintaining project changes during development.
- Developed a Music Player application with play, pause, next/previous, seek, shuffle, and repeat controls, along with Explore, playlists, and artist browsing features.
- Implemented Firebase Authentication in the Music Player application, including Forgot Password and Google Sign-In, and used BLoC for state management.
- Developed a PDF Reader application with PDF viewing, file handling, sharing, PDF compression, and image-based PDF functionality using Flutter PDF packages.
- Created an Expense Tracker application using SwiftUI for iOS with features including expense entry, categorization, data persistence, and analytics visualization.

PERSONAL PROJECTS

Pantry Plus — Flutter, Firebase

- Developed a complete cross-platform grocery shopping application for Android and iOS using Flutter.
- Integrated Firebase Authentication for user registration and login, Firestore for application data, and Cloud Storage for product images.
- Implemented product browsing by categories, cart management, order placement, user profile management, and an admin panel.
- Designed responsive Flutter interfaces and applied structured state management and reusable components to keep the application maintainable.

EDUCATION

Bachelor of Computer Science

2021 – 2025

Abdul Wali Khan University Mardan

F.Cs

2019 – 2021

Government Post Graduate College Mardan
